Education

Ph.D. in Economics, University of Florida - GPA 3.96	2026
Specialization: Applied Microeconomics, Industrial Organization, Economics of Education	
M.A. in Economics, University of Florida - GPA 3.96	2022
B.A. in Economics, University of Florida - GPA 3.81 <i>Summa Cum Laude</i>	2020
B.S. in Mathematics, University of Florida - GPA 3.81 <i>Cum Laude</i>	2020
B.S. in Statistics, University of Florida - GPA 3.81 <i>Cum Laude</i>	2020

Employment

Graduate Instructor , University of Florida	August 2023 – April 2026
- Designed, taught intermediate microeconomics course over five semesters	
Graduate Assistant , University of Florida	August 2020 – August 2023
- Analyzed legal, financial filings to assist with Javier Donna and Anita Walsh's paper on competition issues in the pork industry.	
- Reviewed, revised course materials, research papers for three professors	
Summer Analyst , Federal Reserve Bank of New York	June 2019 – August 2019
- Developed data cleaning pipeline in R for records prepared by outside contractors	

Selected Research Projects

Distributional Effects of Mergers: Evidence from Low-Cost Carriers (Solo Author)

- Implemented BLP analysis to analyze proposed, blocked JetBlue-Spirit Merger
- Estimated merger blocking deprived consumers of over \$350 million in welfare gains
- Processed over 100GB of data from Department of Transportation using R
- Implemented structural demand model, merger simulations using pyblp in Python
- Classified 10,185 regulatory filing comments using Natural Language Processing
- Presented at 2024, 2025 Southern Economics Association conferences

Does Online Testing Make the Grade (Lead Author)

Education Finance and Policy, 2025

- Designed, executed novel experiment to evaluate online and in-person testing
- Estimated effect of online testing using 2SLS methodology
- Secured over \$10,000 from University of Florida Office of Distance Learning
- Presented at City University of New York seminar series

The Quality of Online Instruction and Returns to Instructor Experience (Co-Author)

Economics of Education Review, 2025

- Applied multiple matching methods to assess student selection into online sections using R, Stata
- Constructed panel data containing over 25,000 course level observations and over 436,000 student level observations spanning 9 years of institutional records

Skills

<u>Computer:</u>	<u>Proficient:</u> R, LaTeX <u>Experienced:</u> Stata, Git, Python (pandas, numpy, transformers, pyblp), Microsoft Excel, SQL, High-Performance Computing, <u>Familiar:</u> ArcGIS, MATLAB, Web Scraping
<u>Statistics:</u>	Causal Inference, Demand Estimation (Structural), Experimental Design, Sampling, Survey Design, Data Analysis, Natural Language Processing / Text Classification, Instrumental Variables, Panel Data Methods, Merger Simulation, Propensity Score Matching, Kernel Matching, Mahalanobis Distance Matching, Logit Regression
<u>Languages:</u>	English (Native), Japanese (N2, Business Level)
