Education

Ph.D. in Economics, University of Florida - GPA 3.96	2026
Specialization: Industrial Organization, Applied Microeconomics	
M.A. in Economics, University of Florida - GPA 3.96	2022
B.A. in Economics, University of Florida - GPA 3.81 <i>Summa Cum Laude</i>	2020
B.S. in Mathematics, University of Florida - GPA 3.81 <i>Cum Laude</i>	2020
B.S. in Statistics, University of Florida - GPA 3.81 <i>Cum Laude</i>	2020

Employment

Graduate Instructor , University of Florida	August 2023 - Present
- Designed, taught intermediate microeconomics course over five semesters - Completed research projects in economics	
Graduate Assistant , University of Florida	August 2020 – August 2023
- Analyzed legal, financial filings in pork sector in alleged collusion case - Reviewed, revised course materials, research papers for three professors	
Summer Analyst , Federal Reserve Bank of New York	June 2019 – August 2019
- Developed data cleaning pipeline in R to standardize records prepared by outside contractors -	

Selected Research Projects

Distributional Effects of Mergers: Evidence from Low-Cost Carriers (Solo Author)

- Studied proposed, blocked JetBlue-Spirit Merger
- Processed over 100GB of data from Department of Transportation using R
- Implemented structural demand model, merger simulations using pyblp in Python
- Estimated consumer welfare gains of over \$350 million
- Classified 10,185 regulatory filing comments using Natural Language Processing
- Presented at 2024, 2025 Southern Economics Association conferences

Does Online Testing Make the Grade (Lead Author)

- Designed, executed novel experiment to evaluate online and in-person testing
- Estimated effect of online testing using 2SLS methodology
- Secured over \$10,000 from University of Florida Office of Distance Learning
- Presented at City University of New York seminar series

The Quality of Online Instruction and Returns to Instructor Experience (Co-Author)

- Applied multiple matching methods to assess student selection into online sections using R, Stata
- Constructed panel data containing over 25,000 course level observations and over 436,000 student level observations spanning 9 years of institutional records

Skills

<u>Computer:</u>	<u>Proficient:</u> R, LaTeX <u>Experienced:</u> Stata, Git, Microsoft Excel, SQL <u>Familiar:</u> Python (transformers, pyblp, pandas), ArcGIS, MATLAB, Web Scraping
<u>Statistics:</u>	Causal Inference, Demand Estimation (Structural), Experimental Design, Sampling, Survey Design, Data Analysis, Natural Language Processing, Instrumental Variables, Panel Data Methods, Merger Simulation, Propensity Score Matching, Kernel Matching, Mahalanobis Distance Matching, Logit Regression
<u>Languages:</u>	English (Native), Japanese (Business Level, N2)
<u>Other:</u>	Research Management, Technical Writing, Public Speaking, Teamwork, Mentorship
